

Canion3D Inc.

Our Story, our mission, our vision,
our future...

Presented by: Tyrone "Ty" Canion

Canion3D

Canion3D Inc.

- Established as the Sole Proprietorship 3DecorRVK in 2015
- Began our journey as a maker of 3D Printed Parts
- Entered retail market with first product – The Canion3D “Writer” 3D Pen in 2016
- Has now grown to over 50+ products
- Medical/Dental Device Manufacturing
- 3D Printing Cloud Platform (3D Print-as-a-Service)
- Winner of the 2019 Corporate Vision Magazine SB award (innovative 3D Printing Products)

Canion3D

Our mission...

- To be a retailer of only the best 3D Printing Products
- To provide our customers with the best customer service
- Become a game changer in medical/dental 3D Printing
- Developing computer applications and platforms for the cloud
- Using our platform and business success to help those who need the most constructive help

Our vision...

- Growing into becoming a game changer in the 3D Printing/AM industry
- Providing products and services that can benefit society
- Establishing relationships with companies that share our vision
- Being on the cutting edge and innovative through our own products

The problem...

- With the COVID-19 Pandemic medical practitioners have gone to tele-health/tele-medicine to consult with patients
- Patients for medical treatments, dental visits, surgeries etc. are facing either back logs or cancellations due to the pandemic
- Even when the pandemic ends (if it does) there is an inherent need for medical practices worldwide to adopt 3D Printing technologies in their practices.
- Hospitals and medical/dental staffs need to be adequately trained and must maintain and service 3D Printing equipment which takes away time with patients.

Canion3D

The solution...Canion3D Medical 3D PrintLabs

- Locations throughout in the U.S. and Germany
- 3D Printers producing dental devices
- Intra Oral Scanners
- CT/MRI scanning
- Design/Manufacture Medical/Dental Devices and Anatomical models for pre/post op surgeries
- 3D Print-as-a-service Cloud Platform for 3D images, 3D Printing Networks, Storage etc.

3D Printing Labs (con't)

- Primed and positioned to start within 3-6 months
- Starting IT Infrastructure in place (Physical Storage/Cloud Storage, high speed internet etc.)
 - We will also offer our storage as a service to other companies
- All equipment/materials already procured for R&D
- Training program for employees/lab users in the works
- Need funding to procure production equipment/lab space
 - Production Equipment includes: Formlabs Form 3B Dental 3D Printers
 - Washing station for curing parts
 - Dental grade resins
 - Intra Oral scanners (White labeled for Canion3D)
 - CT/MRI Scanners
 - Hiring of dental/medical professionals and consultants

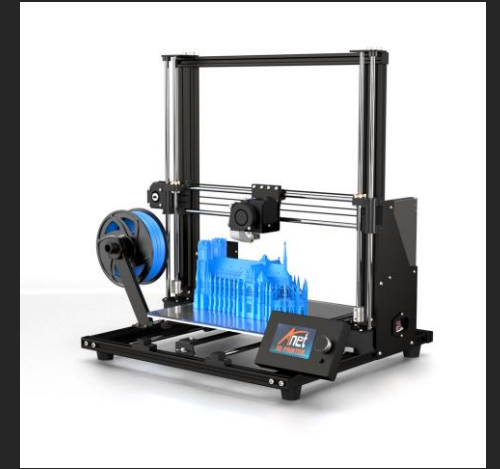

Our current products...

Canion3D

- 3D Printers
- 3DPaaS Cloud Platform
- 3D Pens
- 3D Printing Filament
- E-Books

Our products: 3D Printers

Canion3D

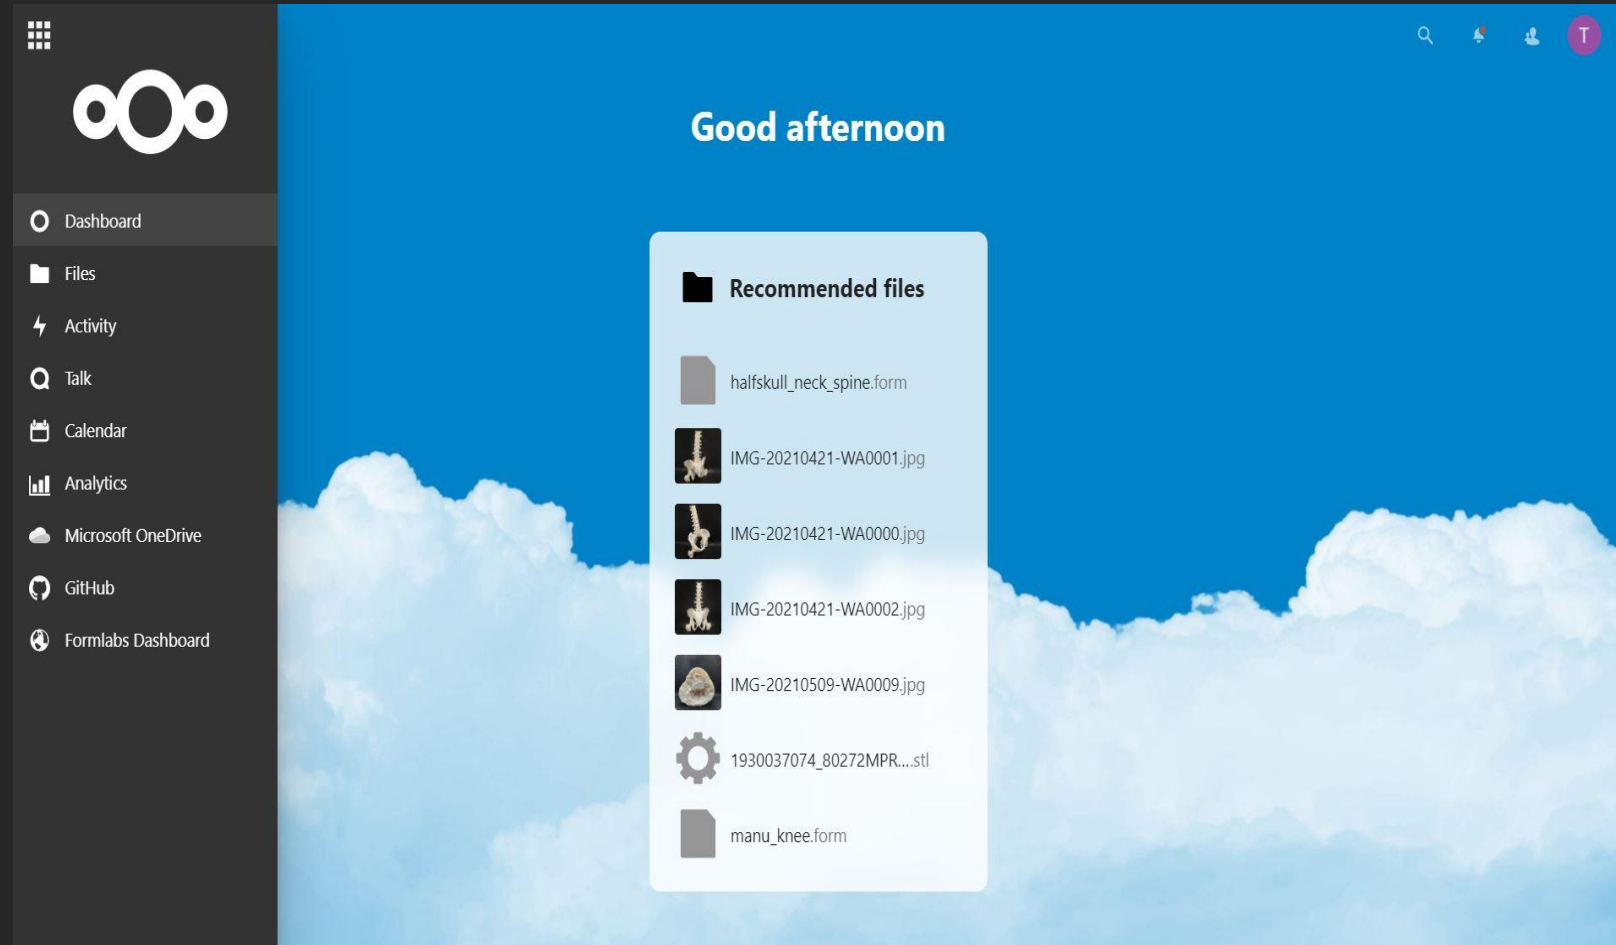

3D Print-as-Service (3DPaaS)

URL: <https://cloud.canion3d.com>

- Using our exclusive 3DPrint-as-a-Service cloud platform, users can access a variety of applications and services to enhance your 3D Printing experience.
- 3DPrint-as-a-service is a mesh of Software-as-a-service (SaaS), Platform-as-a-service (PaaS), and Infrastructure-as-a-service (IaaS), as means to allow users of 3D Printing devices, applications, and networks to streamline production processes and eliminate the silos that exist in the 3DP/AM technologies.
- With 3DPrint-as-a-service (3DPaaS), users of the service can access a marketplace for 3D Printing applications, CAD applications, 3D Printer networks, and much more.
- Built on a platform that can be accessed through Canyon3D's proprietary 3DPaaS web platform, the service gives users of 3D Printing and AM a centralized and non-siloed location to access virtually anything related to 3D Printing.
- Application vendors can set metered pricing of applications, offer free trials or full licensing cost.
- While there are currently printer sharing services, 3DPaaS will allow users to create their independent printer networks that can be shared worldwide and provide their users accurate and transparent pricing of their parts' design and build. Furthermore, developers can operate, develop applications, and make enhancements to open-source applications.
- We are looking to work with the biggest names in the IT and 3D Printing/AM Industries to expand the platform

Our products: 3DPaaS

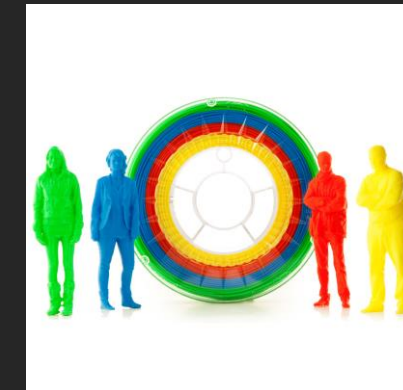

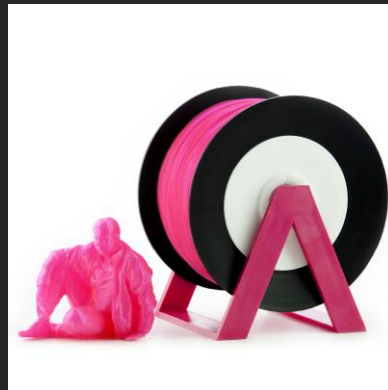

Our products: 3D Printing Pens

Anatomical Patient Models

Our productions partners...

- EU Makers – Barletta, Italy

- Shenzhen Anet Technology Co., Ltd – Shenzhen, China

- Creality - China/U.S.

CREALITY

Canion3D

Our market...

- The global 3D printing healthcare market size was valued at \$973 million in 2018, and is projected to reach \$3.692 billion by 2026, growing at a CAGR of 18.2% from 2019 to 2026.
- In 2021 Medical 3D Printing technology will be worth 1.3 billion.
- The global 3D printing market size across all industries is slated to reach USD 51.77 billion by 2026, surging at a CAGR of 25.8% during the forecast period.
- We are primed to be at the forefront of medical/dental, cloud-based apps, and retail 3D Printing with sound investment.

Our competitors

Canion3D

- **Materialise**
- **ENVISIONTEC, INC.**
- **3D Systems, Inc.**
- **Stratasys Ltd.**

Financials...

- We will need \$500,000 to \$1,000,000 initial investment
- This amount will sustain us for 4-5 years.
- We are already generating revenue through our retail sales. We anticipate that we will start to generate revenue from the Medical 3D Printing within the first 6-9 months.
- Added investment in our retail business unit will help generate more revenue through our multitude of sales channels.
- Opportunities for revenue:
 - Retail sales of 3D Printers, 3D Pens, consumables, and accessories
 - Sales of our White Labeled Intra Oral Scanners
 - Medical device manufacturing (both internal and external)
 - 3D Printing service provider
 - Training and Educational platforms
 - 3D Print-as-a-service subscriptions/usage
- Operating costs:
 - Personnel (3 full-time employees at each location along with 2-3 consultants)
 - Initial purchase of equipment and maintenance
 - Network/Cloud Infrastructure
 - Purchase of consumables
 - Lab space rental/purchase
 - Company logistics – vehicles, postage, etc.
 - Advertising

Canion3D

Our future...

Our future (con't)...

- Continuing to Expand our brand!
- Continuing to build relationships within the 3D Printing/AM industry
- Giving more to charitable causes
- Providing training and educational materials and platforms.
- Inspiring others!

Thank you!!
